

APPLICATION MENU & FLOW GUIDE

Umrah & Hajj Travel ERP

The application menu structure and the step-by-step flow of every menu — login, master data, transactions, reports and settings.

System for

AL RAWDA GROUP HAJJ & UMRAH SERVICES

Bank Street, Street No. 910, Doha — Qatar

Contents

#	Menu / flow
1	Application menu map (full tree)
2	Login & main navigation flow
3	Transaction → Basic → Package
4	Transaction → Basic → Visa Type
5	Transaction → Basic → Nationality
6	Transaction → Activity → Invoice
7	Transaction → Activity → Receipt
8	Transaction → Activity → Payment
9	Transaction → Reports → All Report
10	Settings menu

How to read the flow diagrams

Menu / user action
 System response / output
 Decision / branch
 Screen / form

Every transaction and master-data screen follows the same layout as today: a **List** on the left and a **Detail** form on the right with **New**, **Save** and **Delete** actions. The flows below reflect that pattern.

1. Application Menu Map

FULL MENU TREE

All items also open as tabs across the top bar (Invoice · Receipt · Payment · All Report · Package · Visa Type · Nationality), so several records can stay open at once — matching the current application.

Figure 1 — Complete application menu tree.

Top menu	Contains
Transaction → Basic	Package, Visa Type, Nationality (master data)
Transaction → Activity	Invoice, Receipt, Payment (daily transactions)
Transaction → Reports	All Report — 6 report types selected by radio button + date range
Settings	Company info, users & roles, dynamic fields & print templates

2. Login & Main Navigation

ENTRY POINT

Figure 2 — Login and entry to the menus.

1. User opens the application in a browser and logs in (username, password, optional 2FA).
2. The system checks credentials and the user's role.
3. On success, the Dashboard opens with only the menus the role is allowed to use.
4. From the top bar the user opens any menu — Transaction (Basic / Activity / Reports) or Settings — each opening as a tab.

3. Package

TRANSACTION → BASIC → PACKAGE

Maintains travel packages and their rates (e.g. “5 Days Umrah With Visa — 1050”).

Figure 3 — Package flow.

1. Open **Package**; the list of existing packages loads with search/filter.
2. Click **New** for a new package, or select a row to edit.
3. Enter **Package Name** (English and Arabic) and **Rate**.
4. Click **Save**; the list refreshes. Use **Delete** to deactivate an unused package.

4. Visa Type

TRANSACTION → BASIC → VISA TYPE

Maintains the visa types used on invoices and receipts (e.g. Umrah Visa, Tourist Visa).

Figure 4 — Visa Type flow.

1. Open **Visa Type**; existing types load in the list.
2. Click **New** or select a row.
3. Enter the **Visa Type** name and **Save**; the list refreshes.

5. Nationality

TRANSACTION → BASIC → NATIONALITY

Maintains the countries / nationalities list (country name, short name, Arabic name).

Figure 5 — Nationality flow.

1. Open **Nationality**; the country list loads with search/filter.
2. Click **New** or select a row.
3. Enter **Country Name**, **Short Name** and **Name in Arabic**.
4. Click **Save**; the list refreshes.

6. Invoice

TRANSACTION → ACTIVITY → INVOICE

Creates the sale: customer, package, passengers and amounts.

Figure 6 — Invoice flow (with optional approval branch).

1. Open **Invoice**; the invoice list loads. Click **New**.
2. Fill the header: customer name, nationality, mobile 1/2, package, departure date, no. of passengers/seats/visas, room type.
3. Add **passenger rows** (name, visa type, visa-required).
4. The system computes **Amount**, **Discount** and **Net Amount** from the package rate.
5. Click **Save**. If approval is required, the invoice goes to the approver as *Pending*; otherwise it can be printed straight away.
6. **Print** the bilingual invoice via the dynamic print engine.

7. Receipt

TRANSACTION → ACTIVITY → RECEIPT

Collects money against an invoice and prints the bilingual Receipt Voucher (سند قبض).

Figure 7 — Receipt / collection flow.

1. Open **Receipt** and click **New**.
2. **Select the invoice**; customer, package and passenger details auto-fill.
3. The system shows invoice amount, previous balance and remaining balance.
4. Enter the **received amount** and **mode of payment** (cash / bank).
5. Click **Save**, then **Print** the bilingual Receipt Voucher; the balance updates.

8. Payment

TRANSACTION → ACTIVITY → PAYMENT

Records office expenses and customer refunds.

Figure 8 — Payment flow (expense or refund).

1. Open **Payment** and click **New**; choose **Type**: Expense or Refund.
2. **Expense** — enter paid-to, mobile, narration, amount (e.g. office, salary, taxi, printing).
3. **Refund** — select the invoice and the amount to refund.
4. Click **Save** and **Print** the voucher. A refund reduces the linked invoice's balance.

9. All Report

TRANSACTION → REPORTS → ALL REPORT

One report screen produces all six report types by selection and date range.

Figure 9 — Report flow; one screen, six report types.

1. Open **All Report**.
2. Choose the **report type** with the radio button: Income Summary, Pending, Income Detail, Passengers List, Departure Date wise, or Expense.
3. Set the **Start Date** and **End Date**.
4. Click **Print**; the report renders to preview, then export to PDF or Excel.

Report type	Shows
Income Summary	Invoice / received / refund / income / balance per invoice, with totals
Pending	Invoices with outstanding balance
Income Detail	Detailed income breakdown
Passengers List	Passengers grouped by departure date with invoice & customer
Departure Date wise	Invoices grouped/filtered by departure with approval status
Expense	Payment vouchers with narration and grand total

10. Settings

TOP BAR → SETTINGS

Administrator area for company details, users, and the dynamic field / print configuration.

Figure 10 — Settings menu flow.

1. Open **Settings** (admin only).
2. **Company info & branding** — name, address, contacts, logo used on all vouchers.
3. **Users & roles** — create users and assign role-based permissions.
4. **Dynamic fields** — add/edit form fields on any screen without code; map printable fields into templates.
5. **Print templates** — edit invoice, receipt, payment and report layouts (bilingual); **Save** to publish.
